

This is the testimony of Gisela Mann, a resident of Riverdale, GA who was a victim of black mold.

Here is her story.

The Mann family house sustained considerable water damage during Hurricane Cindy and then damage from Hurricane Dennis. The water filled the entire basement and covered the 12 steps leading to the upstairs living room. There was standing water in the basement for a few days. Over the next few months following these two hurricanes; Mrs. Mann began manifesting symptoms which could not be readily identified. She developed hives, Epstein-Barre Syndrome, nausea and became allergic to almost everything edible.

She sought out a natropath and learned that all these symptoms pointed to one villain.....**black mold**. Through a phone call from a mutual acquaintance, she learned about American Air and Water. Mrs. Mann spoke to Fred and began to tell him the grim tale of all that had happened since July of 05.....he perceived from her description of the symptoms that she had a serious situation.

Fred began to tell her about the benefits of his products and how they might be of help. He shipped the items which were the sporacidium and the ultra violet light unit. Through the use of the two products over time, the symptoms that Mrs. Mann had have completely disappeared. She no longer manifests the allergies and the effects from the mold which were tiredness, weakness, nausea and the general destruction of her health. She is now alive to tell the story.

Thanks to Fred and American Air, there is happy ending to this story. My gratitude to Fred and American Air many times over.

Mrs. Gisela Mann
Riverdale, GA
