

## AA&W Electric Sprayer Operating Instructions

The 8004 plastic tip (Fig. 1) that is attached will provide a 80 degree spray. This tip should be used for general spraying.

**Note:** When changing the plastic tip to the brass tips, please add the enclosed washer for a secure fit, otherwise the fitting will leak.

The 800067 brass tip (Fig. 2) provides a 80 degree spray with a fine atomized spray. This tip should be used for light spraying.

The Y-1 brass tip (Fig. 3) provides a straight fine atomized spray (25 degree to straight stream). This should be used for fogging the cavities behind walls.
